

# Landis Woods Nature Preschool Newsletter

“Spring is nature’s way of  
saying, ‘Let’s Party!’”  
-Robin Williams

We are having fun! We have learned the letters R, O, L, M and are focusing on syllables, phonics, and poems. We continue to expand on our sight words and our current list includes: help, is, for, go, away, in, can, come, a, big, I, blue, find, it, here, funny, and, jump, and down. Feel free to practice a few of these with your child and they will be reading to you before long!

We have learned about ruminants, ocelots, lizards, and maple syrup. We have enjoyed tapping maple trees, watching Mr. Alex boil sap, and even got to taste freshly made syrup! In preparation for spring visitors, we have been learning about life cycles of many animals including birds, fish, and insects. Last week our bearded dragon, Clem, joined the class, this week we hatched out some feathered visitors, and we expect some insect and amphibian friends to join us in the next few weeks! Finally, to learn about O, we hosted Nature Preschool Olympics!

## Having Fun

At the beginning of the month, we celebrated Dr. Seuss week, reading stories, dressing for silly theme days, and even making special green eggs!

Although we really enjoyed playing in the snow, we are excited to shed our snow suits with the warm weather! We celebrated the start of spring and have noticed many changes in the forest including flowers, robins, and more!

## In the Future...

As the weather warms back up, we plan to revisit and reinforce fine motor skills like cutting and writing. We continue to practice songs for our Spring Program as well!

**Spring Program May 21st**  
**3's & 4's 9:15am**  
**Afternoon 12:45pm**

**NO SCHOOL April 2 + 5!**
